GREEN RIBBON GUIDELINES

- » Limited to no lawn or artificial grass.
- » Majority native or low water plants
- » Natural mulch covering soil
- » Majority ground surface non paved

- » Good level of design and maintenance
- » Obvious effort and curb appeal

CASH FOR TURF REMOVAL

California American Water offers rebates for removal of existing grass and replacement with drought-tolerant landscaping. Customers can receive a cash-back rebate of over \$1,100 (\$1.50 per square foot up to 750 square feet) for a qualifying landscape conversion. The Turf Removal Program is the perfect way to save money and water while beautifying your landscape.

AVOID FAKE GRASS

A popular misconception is that artificial turf is environmentally friendly because it requires less water. In reality, it's a plastic pollutant that is harmful to the soil and biodiversity as well as humans. As a result, fake grass should be avoided in earth-friendly home fronts.

VISIT THE FLOWER SHOW

Please visit Emerald Keepers' booth at the Flower Show to learn more about Earth Friendly Home Fronts and other environmental initiatives for Earth Month.

SUPPORT EMERALD KEEPERS

Emerald Keepers is a 501(c)(3) non-profit corporation.
