CORONADO COMMUNITY CONFERENCE

Practical solutions to fight climate change

What can I do? We've often asked ourselves that question when it comes to climate change. As the world has become steadily hotter and the weather increasingly dangerous and unpredictable (a hurricane at our doorstep this summer!) now is the time to act.

Join Emerald Keepers for the second annual Coronado Community Conference to learn ways to tackle the climate crisis. Experts will share practical solutions to build climate resilience in the community and at home. Building on the successful convening last year, this conference is an opportunity for everyone in the community to come together to take meaningful steps for a more

sustainable future for our children.

Learn how you can become part of the solution with tips that will help the planet as well as your pocketbook.

Keynote speaker Adam Aron is a climate activist and professor of psychology at the University of California, San Diego. He produced the documentary "Coming Clean" and recently released the book "The Climate Crisis." His work focuses on the social science of collective action on the climate crisis, working with the Green New Deal at UC San Diego where he has volunteered on several campaigns such as ElectrifyUC. Aron will speak about the importance of social mobilization in confronting the climate crisis.

CORONADO COMMUNITY CONFERENCE

- » 8:30am to 2pm, October 11
- » Nautilus Room, Coronado Community Center
- » Deadline to register is Oct. 2
- » For information and registration, go to emeraldkeepers.org

Other highlights:

- Sean Armstrong of Redwood Energy shares his expertise on all-electric buildings. Armstrong led the design of more than half the all-electric homes built in California between 2011 and 2020. He is the U.S. State Department's global representative on zero-net energy policy.
- Darbi Berry, director of the

San Diego Regional Climate Collaborative, speaks on climate innovation in San Diego.

• A presentation by Mark Iannon of Circuit about the upcoming OZ electric shuttle.

• Karin Burns, CEO of San Diego Community Power, on community energy solutions.

• Composting and zero-waste projects by Emerald Keepers interns.

• Native plants and birds by Andrew Myer of the San Diego Audubon Society.

• Melissa Morris of Oceana on the impacts of plastics.

• Gourmet, zero-waste lunch.

Don't miss this informative and interactive event. Registration by Oct. 2 is required.
