For an Emerald Green, Ocean Blue Coronado

Happy Thanksgiving

With the climate crisis; sewage in our oceans and on our beaches; and plastics invading waters, land, air, wildlife and human systems, it is easy to fall victim to negative thoughts. Gratitude can ease burdens and center us. Being grateful for community, friends, and family can help us heal and provide perspective.

Change is possible.

To all Emerald Keepers, thank you for doing your part to make Coronado a model city for sustainability and a better place for current and future generations.
