

# EMERALD KEEPERS

For an Emerald Green, Ocean Blue Coronado

“The time for seeking global solutions is running out. We can find suitable solutions only if we act together and in agreement.”

~ **Pope Francis, 266th Catholic Pope, on climate change**

“We know that the future of the Earth must not be compromised. We bear a sacred trust in our tenancy here and a covenant with those most precious to us — our children and theirs.”

~ **President George H. W. Bush**

“Twenty-five years ago people could be excused for not knowing much, or doing much, about climate change. Today we have no excuse.”

~ **Desmond Tutu, Former Archbishop of Cape Town**

## LET YOUR VOICE BE HEARD

The City of Coronado is accepting public comment on their draft Climate Action Plan.\* Emerald Keepers believes the City can do more to reduce greenhouse gases. We need a strong plan that demonstrates real leadership.

Use our pre-filled template to email City Council and ask that they take measureable and viable steps to protect the City and its residents from climate change. Making a difference has never been easier. Go to this link to get started: [emeraldkeepers.org/climate](http://emeraldkeepers.org/climate)

“Climate change knows no borders. It will not stop before the Pacific Islands and the whole of the international community here has to shoulder a responsibility to bring about sustainable development.”

~ **Angela Merkel, Chancellor of Germany**

“Climate change, if unchecked, is an urgent threat to health, food supplies, biodiversity, and livelihoods across the globe.”

~ **John Kerry, U.S. Special Presidential Envoy for Climate**

“What you do makes a difference, and you have to decide what kind of difference you want to make.”

~ **Dr. Jane Goodall, Scientist & Activist**

“One can see from space how the human race has changed the Earth. Nearly all of the available land has been cleared of forest and is now used for agriculture or urban development. The polar icecaps are shrinking and the desert areas are increasing. At night, the Earth is no longer dark, but large areas are lit up. All of this is evidence that human exploitation of the planet is reaching a critical limit. But human demands and expectations are ever-increasing. We cannot continue to pollute the atmosphere, poison the ocean and exhaust the land. There isn't any more available.” ~ **Stephen Hawking, Physicist & Author**
